Business and Management

Siena Heights University offers a Bachelor of Business Administration (BBA) degree in the areas of Accounting, Business Administration, Management and Marketing. A Bachelor of Arts (BA) degree is offered in Sport Management. An Associate of Arts (AA) degree is offered in Accounting and Business Administration.

Concentrations
Concentrations are a series of courses in a particular business field. They are designed to allow the student further study in one or more areas of interest. Students majoring in business administration may concentrate in one or more of the following areas: accounting, computer and information systems, finance, international business, management, and marketing. Concentrations are only offered to students majoring in business administration.

GPA Minimums for the Major
Accounting, Business Administration, Marketing and Sport Management majors require a 2.5 GPA. Students earning a “D” grade cannot count this towards any major if it is transferred from another institution. Otherwise, “D” grades satisfy Accounting, Business Administration, Marketing and Sport Management major requirements provided the minimum GPA is maintained.

Management majors apply a different rule. The Management major simply does-not apply “D” grades to the major requirements, even courses completed at Siena Heights. Management majors can earn “D” cognate grades; however, they must average 2.0 or better for all cognates.

Transfer Credit
1. “D” transfer grades do not apply at all to Division majors, minors or concentrations.

2. After initial enrollment at Siena Heights University, subsequent courses taken elsewhere become “guest courses”. Only guest courses with prior written approval from the program chairperson may apply to the major. The appropriate site director or chairperson must approve, in writing, departures from the student’s approved major degree plan.

3. Accounting and Business Administration majors may transfer in the equivalents of MGT 302 and MKT 310 provided they are junior or senior level courses. Otherwise, to apply either of these courses, the student must earn a “C” or better in a specified Management or Marketing validator at Siena Heights University. Not all courses qualify as validators.
   a. Siena Heights University Management Validators: MGT 357, MGT 360, MGT 361, MGT 450 & MGT 452
   b. Siena Heights University Marketing Validators: MKT 350, MKT 351, MKT 455 & MKT 470
   c. Management majors need to validate the transfer of MKT 310 and Marketing majors validate MGT 302.

4. For any business major, a minimum of 24 credits in the major must be completed at Siena Heights University. These can include cognate requirements, core requirements, major requirements or major electives. For Accounting majors, at least 12 of these 24 hours must be “ACC” courses. For Sport Management majors, at least 12 of these 24 hours must be “SMG” courses excluding SMG 280 and SMG 480. The Management and Marketing majors require 24 credits completed at Siena Heights University. See your advisor for details.

5. For many business minors, a 12 semester hour minimum must be taken with Siena Heights University at the 300-400 level.

Applying Credits
Unless it is a cognate, in one or both instances, the same course does not apply to two majors or to both a major and a minor. Courses that are part of an AA degree, however, do apply towards a BA or BBA. See your advisor for details.

Program Learning Outcomes
The business program prepares students for management positions in a wide variety of organizational settings. Business students will achieve the following competencies:

Communication – the ability to express ideas – in writing, verbally and visually

Creativity – the ability to develop original ideas or use common solutions in unique ways.

Analytical ability – the skill to effectively separate a complex problem into its component parts in order to identify solutions.

Integrative thinking – the ability to detect interrelationships among component parts and assess their importance in creating solutions.

Ethics — the ability to examine decisions in light of ethical and corporate social responsibility principles as well as their effects on stakeholders worldwide.

The business learning outcomes are skills employers seek, and therefore cornerstones of the program.
