# Business Administration

A Bachelor of Business Administration degree from Siena Heights University will open many types of employment opportunities for you. With Siena Heights University's emphasis on communication and ethics, you may confidently choose to start a new career or take your work in the business field to the next level.

Through its curriculum and advising, BBA faculty offer business majors the opportunity to become proficient, engaged citizens. This is imperative in today's business climate. Approximately 60% of the program's core courses are based in case methodology. Case study sharpens analytical ability and heightens student ability to think and reason rigorously.

Other focuses in the BBA program include communication, creativity, and integrative thinking. We want our students to be able to express their creativity through writing, verbal, and visual means, have the skills to detect interrelationships among component parts and assess their importance in creating solutions.
